

From Code to Stage

A Tech Student's Guide to Nailing Presentations

Torben & Nicolas

Agenda

- 1 Introduction
- 2 Presentation Techniques
 - 2.1 Five Steps to Presentation Success
 - 2.2 Phase 1 Foundation
 - 2.3 Phase 2 Ideation
 - 2.4 Phase 3 Creation
 - 2.5 Phase 4 Illustration
 - 2.6 Phase 5 Connection
- 3 Questions & Feedback

The background of the slide is a dark, grayscale aerial photograph of a city. A large, bright orange number '1' is superimposed on the left side of the image. To the right of the number, the word 'Introduction' is written in a large, orange, serif font.

1 Introduction

Who we are?

Nicolas Sell

Director

Cloud & AI
Hannover

Torben Sieg

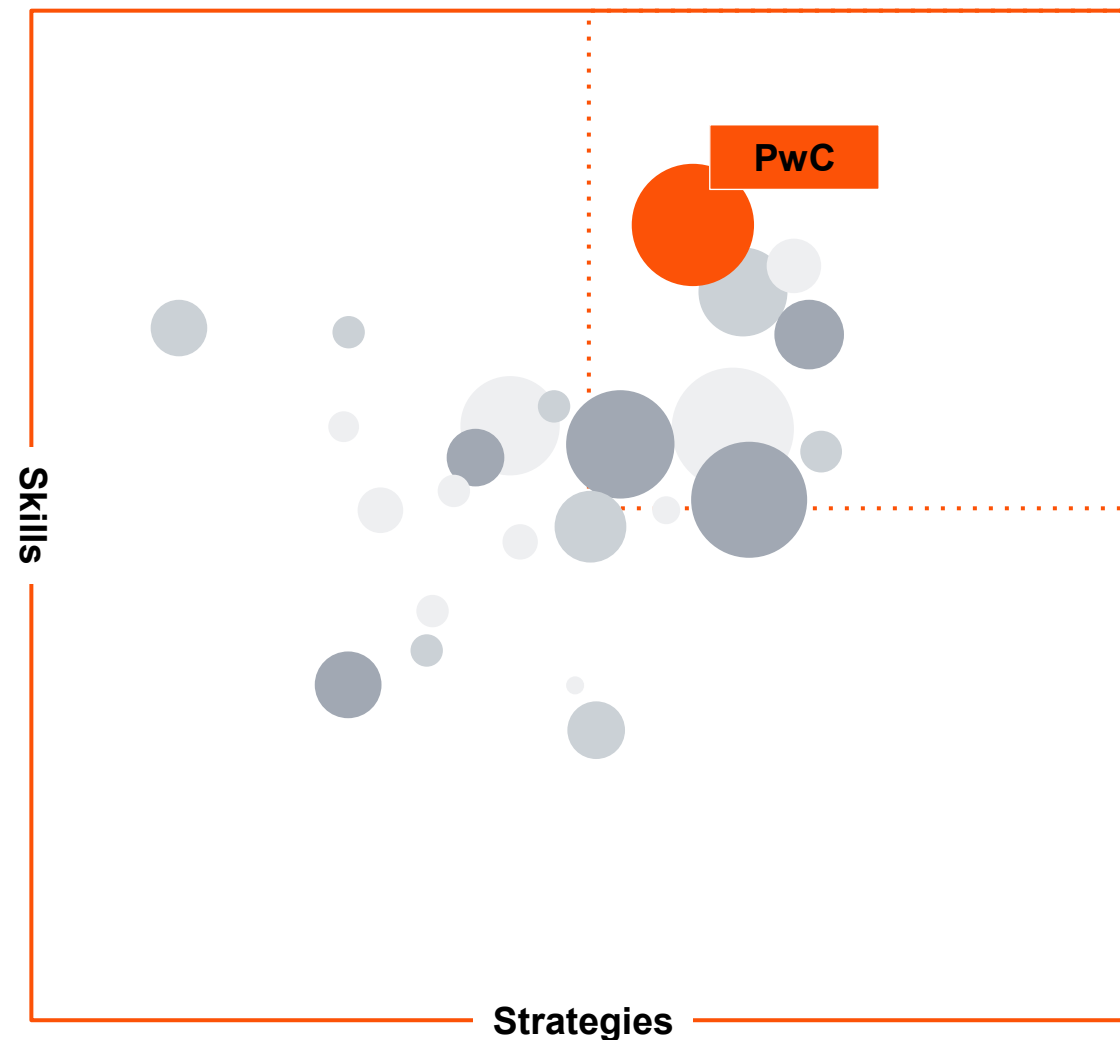

Senior Associate

Cloud & AI
Hannover

PwC's approach is about **solving business problems** in a way that they are supported and **enabled by technology** but not driven by technology alone.

IDC - Cloud Professional Services Assessment 2024

Cloud & AI Transformation Practice Group

Our German team, with over

400 Cloud & IT Experts

serves as the face to our customers with deep and broad expertise.

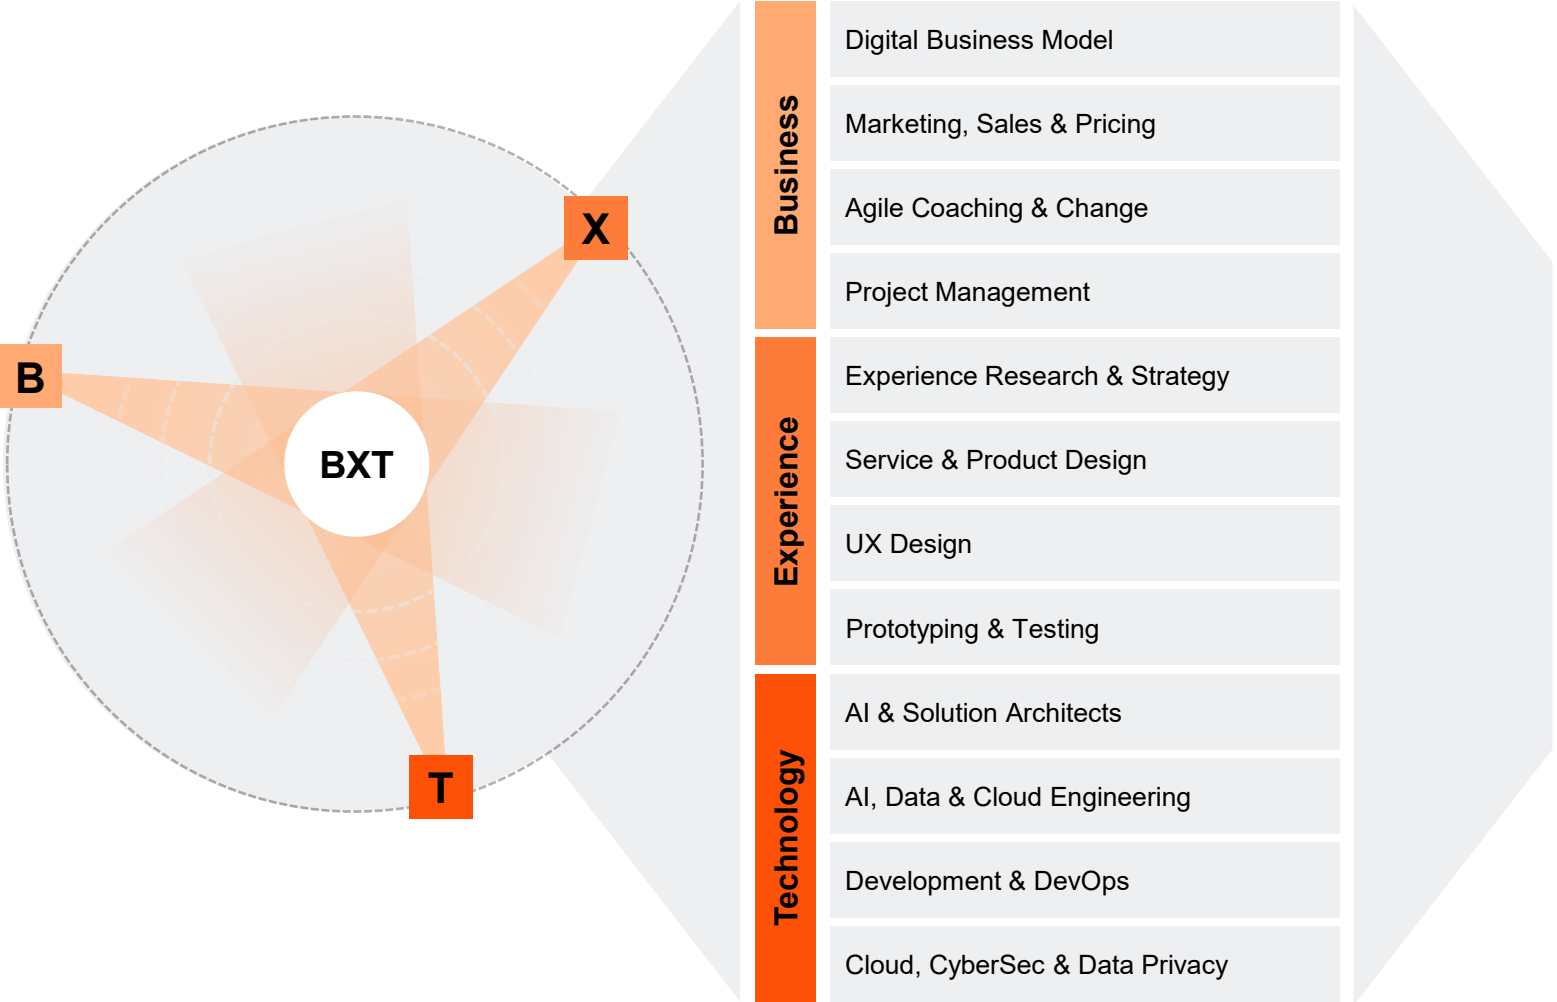

The Egyptian team consists of over

1.000 Technically skilled colleagues

focusing on the areas of AI Engineering, MLOps, Cloud and CyberSec.

PwC provides holistic support from the digital business model, from the user experience to the technical implementation

“

The PwC Cloud team is more than just a service provider, **they are real partners on our digital journey.**

Their expertise in business innovation, design thinking and cloud-native software development, coupled with their focus on customer centricity, enables us to **jointly develop innovative apps and AI solutions** that deliver significant business value.

Saurin Patel, Chief Digital & AI Officer

Master Seminar in Cooperation with PwC

Seminar paper topics:

1. “AI-Anamnesis of Patients” - *Anton Reinhard & Leonard Niedens*
 - *Developing an AI-supported workflow that records, transcribes, and summarizes patient consultations to enable accurate, efficient, and less distracting medical anamnesis documentation*
2. “Evaluation of RAG Systems” *Daniel Schubert & Dennis Block*
 - *Evaluation and improvement of retrieval-augmented generation (RAG) systems for reliable, trustworthy AI applications.*

Supervisor of the Seminar on behalf
of PwC

Presentation Techniques

Five steps to Presentation Success

1

2

3

4

5

5 Phases:

Foundation

It's not **your** presentation... it's **theirs**
– Present for them, not for you.

Ideation

Aim not to **inform** but to **transform** – Don't just share knowledge – shift perspectives.

Creation

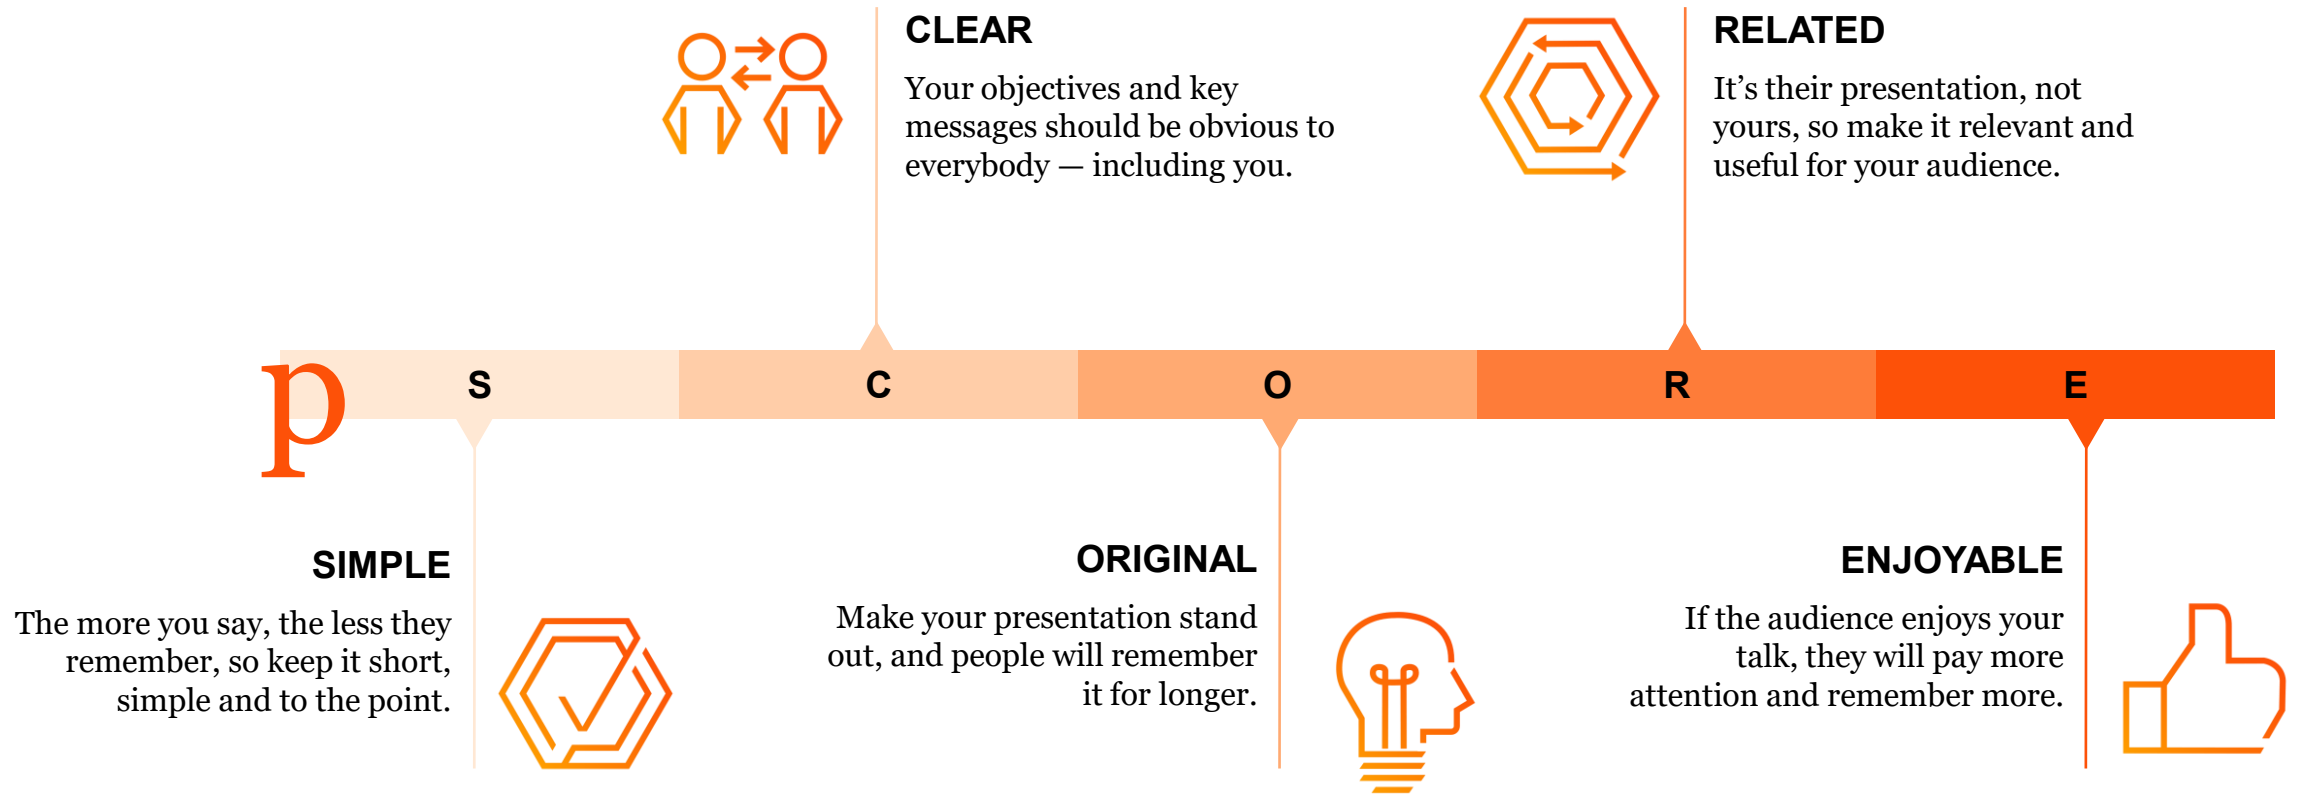

Create your **story before** your **slides** – Build the narrative before you design.

Illustration

Don't **confuse** slides with **documents** – Slides support & documents explain.

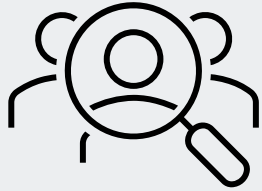

Connection

Aim not for **perfect** but for **personal** – Connection over perfection.

Phase 1 - Foundation

Audience

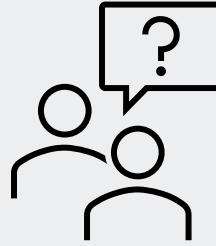

Audience:

Who are the people in your audience?

Who are you talking to?

Burning Needs

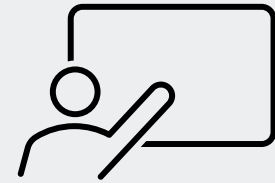

Burning Needs:

What do they really need?

What do they expect from you?

Context

Context:

Do you have everything for the Presentation?
(Room, Projector, Microphone, etc.)

Phase 2 - Ideation

Understand how your audience thinks, believes, feels & acts

THINK

- What do they know?
- What do they need to know afterwards?

BELIEVE

- What do they believe, or think they know?
- What do they need to believe, in order to act?

FEEL

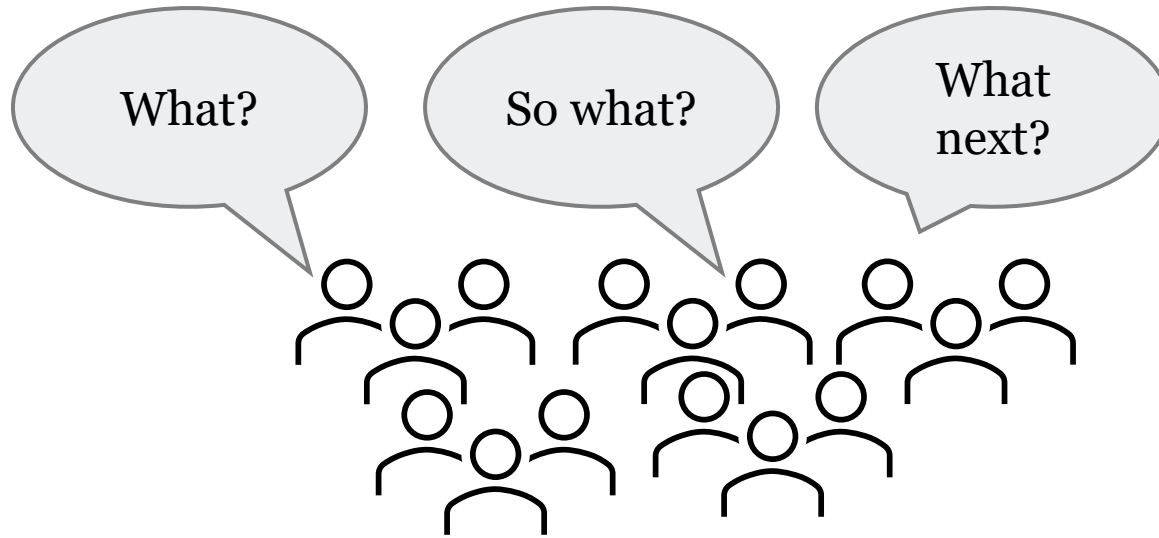

- What do they feel today?
- What should they feel?

DO

- What do they do now?
- What should they do next?

Phase 3 – Creation (1/2)

WHAT?

What is the key message you need to tell your audience?

SO WHAT?

Why should they care? Why is it relevant and important to them?

WHAT NEXT?

Now that they care, what should they do with it?

„I usually only remember one thing from the pitch.

Just tell me what I need to know, no more“

Luc Bretones

Phase 3 – Creation (2/2)

The simple presentation structure

Introduction

Grab attention

Development

Build the argument

Conclusion

Place the message

Two famous approaches

Storyline 1: Burning Platform

→ “If we don’t change now, we are heading toward a much darker future.”

(1)
Context

(2)
Analysis

(3)
Actions

(4)
Results

(5)
Conclu-
sion

Storyline 2: Winning the Princess

→ “Our winning story: creating value by making the world a better place.”

(1)
Ideal

(2)
Reality

(3)
Problem

(4)
Solution

(5)
Conclu-
sion

Phase 4 - Illustration

*Six design principles for slides that stick → **IMPACT***

	What it means
I mage	A picture is worth a thousand words – use bold, emotional visuals
M essage	Every slide carries one clear core message If you can't say it in one sentence → simplify
P ositioning	Where you place elements determines what gets seen first
A nimation	Animations support your story and direct attention
C olour	Colours drive emotion and steer focus Stick to 2–3 colours max, ensure strong contrast for readability
T ypography	Type is design – not just text Use 2 fonts max, establish a clear hierarchy (large → small)

Phase 5 - Connection

Eye Contact

*Look at people,
not at the slides all
the time*

Voice & Pauses

*Vary pace & tone
– silence is power*

Relatability

*Share real stories
– trust follows*

Energy & Body

*Language, Open
posture, move
with purpose*

“Aim not for perfect - But for personal”

3

Questions & Feedback

Thank you
